PROFILE

Curious about technology and innovation from an early age, I started my journey by exploring data and automation, including experimenting with web crawlers and ways to collect and process information. This curiosity led me into web and backend development, where I continued building my technical skills and understanding of software systems.

I have a strong interest in data, analytics, and transforming information into meaningful insights. Currently, I am focused on deepening my technical expertise, improving my understanding of system design and engineering practices, with the long-term goal of combining technical depth with leadership skills to guide teams and contribute to impactful technology solutions.

WORK EXPERIENCE

Back End Engineer | OptiDist

July 2022 – June 2026

- Led backend development for B2B marketplace systems using Node.js, TypeORM, and PostgreSQL.
- Collaborated closely with frontend teams to ensure seamless integration with user interfaces.
- Developed comprehensive API documentation for internal and external stakeholders.
- Leveraged third-party services like Postmark and DigitalOcean to improve platform reliability.
- Optimized complex PostgreSQL queries and database performance, reducing response times and improving application scalability.

Front End Developer | Globalistic

Sept 2021 – March 2022

- Developed large-scale B2B marketplace applications using React and React Native.
- Built interactive 3D features using Babylon.js (similar to three.js/WebGL), including real-time data rendering on component movements.
- Integrated frontend with REST APIs to enable dynamic user interactions.
- Optimized frontend performance and debugged issues for smoother user experiences.
- Created reusable components for maintainable and scalable code.
- Implemented Role-Based Access Control (RBAC) in frontend applications, managing access for different user types and permissions.

EDUCATION

- **Bachelor of Computer Science** | Lebanese International University **2022 – 2024**
- **Computer Science Studies** | Conservatoire National des Arts et Métiers **2020 – 2022**

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java, Python
- **Frontend:** HTML, CSS, React, React Native, Tailwind
- **Backend:** Node.js, Express.js, NestJs, TypeORM, Spring Boot
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud Platforms:** DigitalOcean
- **Other Tools:** REST API integration, websockets, email templates, cron jobs, performance optimization, cypress, jest, responsive design, web scraping with BeautifulSoup

SOFT SKILLS & LANGUAGES

- **Soft Skills:** Problem Solving, Multi-tasking, Team Player
- **Languages:** Arabic, English, French

CERTIFICATIONS

- Spring Boot 3, Spring 6 & Hibernate for Beginners
- Full Stack: Angular and Java Spring Boot E-Commerce Website
- CCNA: Introduction to Networks
- Data Visualization with Python
- DELF B2
